San Juan, PR 00910-1539

**Re: Freedom of Information Request  
EPA-R2-2013-010147**

Dear Mrs. Gerson:

This is in response to your Request for Information, EPA-R2-2013-010147, dated September 20, 2013. The Request asks for information and/or documents concerning the Administrative Compliance Order (ACO) CWA-03-2013-3117 issued to the Municipality of Manatí, Municipal Separate Storm Sewer System (MS4) Permit (PRR040042), and thirty-six other facilities listed on a table on Attachment A. The United States Environmental Protection Agency (EPA), Caribbean Environmental Protection Division, has compiled part of the information requested.

The documents attached include the ACO numbered CWA-03-2013-3117, the Notice of Intent and the Storm Water Management Program related to the Permit Number PRR040042. In relation to the facilities listed in Attachment A, EPA has attempted to contact you to identify the specific information that is needed in order to narrow our search for the facilities listed; for example: permit numbers or specific names of documents. Please note that for many of these facilities information can be easily accessed through our web site. We cordially encourage you to access our database at <http://www.epa.gov/envirofw/> to get available information from multiple programs on these facilities.

If you have any questions regarding this letter, please contact Ms. Yolianne Maclay at (787) 977-5849 or through electronic mail at [maclay.yolianne@epa.gov](mailto:maclay.yolianne@epa.gov).

Sincerely,

  
Nancy Rodríguez  
Acting Chief

Multi-Media Permits and Compliance Branch
